SOCIOLOGY PH.D. STUDENT

I am a sociology PhD student at Stony Brook University, NY and the graduate fellow of Institute for Advanced Computational Science. In my research I use both computational methods and qualitative methods to study the intersection of culture, globalization, and resistance. In my dissertation project I am focusing on international media representations of domestic protests with insights from social movement studies, world society theory, and media studies. I have previously shown how biases in global civil society affect the extent and the tone of the coverage of protests in Iran. I am also interested in protest art and its role on everyday acts of resistance. I am especially interested in Iranian protest rap and the ways in which rappers articulate grievances. Prior to coming to Stony Brook University, I received my BSc in physics from Middle East Technical University, Turkey.
